

# Lead Data Engineer

## Job Description

**Job Title:** Lead Data Engineer

**Reports to:** Founder

**Salary:** £26,000

**Hours per week:** 35

**Location:** Middlewich CW10 and working Remotely

### Job Purpose

We are looking for a Lead Data Engineer to join our team to help develop database solutions, integrate software for our customer's wide range of use cases and eventually manage a team of engineers.

### Responsibilities and Main Duties

- Developing databases for Customers in the Ninox platform.
- Connecting software for Customers using the Integromat/Make platform.
- Communicating with Customers to provide updates on the work you complete.
- Eventually manage and support a team of Data Engineers.
- Documenting all development work completed in our dedicated ERP for others to read and easily understand.
- Completing your work in the set timescales.

## Person Specification

### Skills and Knowledge

- Clear knowledge of database development, including the importance of table relations, basic functions and the importance of the user interface. Experience of building in Ninox is desired, but training will be provided.
- An understanding of application programme interfaces (API) and how these can be used to connect software together. Experience with Integromat/Make is desired but training will be provided.
- Be familiar with Mac OS and Microsoft Office 365.
- Great communication with Customers via all mediums including telephone, email and video. Our Customers are based all over the world.
- Be able to provide excellent Customer Service.
- Have great Time Management skills and Organisation in order to work towards deadlines and deliver projects in set time periods.
- Demonstrate good initiative and be able to work as part of a team and also on your own.
- Be able to manage and motivate a team of people to deliver solutions for Customers on time to the desired standard.
- Continuously demonstrate excellent attention to detail in all aspects of your work.
- Experience in developing websites would be beneficial but not essential.
- A wide Music taste; as we love music!
- Take interest in trying to live and work more sustainably to benefit our planet. We care about our impact on our planet, and so we want our team to care as well!

## Good To Know

### Role and Position

- This role will involve remote working. During the training period, you will be on site (postcode CW10), and then eventually work remotely some days. There is onsite parking available and nearby bus routes.
- There is a 6 Month Probation period for this role.

### Investing In Our Team

- We want to look after our team at Arctec, and so you will also get all the benefits of our PerkBox!
  - o This not only includes helpful financial benefits like discounts at popular stores, but also includes physical and mental health care as well!
  - o Plus, everyone gets a birthday box!
